14th Central European Training School on neutron techniques

Virtual (on-line) theoretical module: 4th-8th October, 2021
Hands-on (off-line) training module: 25th-28th October, 2021

Organizers:
Budapest Neutron Centre,
Centre for Energy Research

Contact:
cets@bnc.hu

Location of practical works:
H-1121 Budapest,
Konkoly-Thege M. út 29-33

The school will be held in hybrid mode: a virtual (on-line) theoretical module and a hands-on training module.

Application deadline: 27th September 2021

The objective of the neutron school is to provide actual hands-on practice – following a theoretical introduction to neutron scattering and to the various neutron based methods for studying the structure and composition of matter.
